

SPECIAL FUEL TAX
RCW 82.38 and 70.149

Tax Base

All combustible gases and liquids used to propel motor vehicles, except motor vehicle fuel (gasoline). The principal types of fuel subject to the tax are diesel, natural gas, propane and butane. For liquids, the tax is measured by gallons; for gases, the tax applies on the basis of 100 cubic feet measured at standard pressure and temperature.

Similar to the motor vehicle fuel tax, the special fuel tax is now applied when the fuel is delivered from a "terminal rack" within the state, instead of at the distributor level. The terminal rack is the platform from which the fuel is delivered into trucks, trailers or rail cars from a refinery or import terminal.

An additional tax applies to each gallon of petroleum based product (including stove oil, diesel, or kerosene) used for space heating (RCW 70.149.080). This tax, denoted as the pollution liability insurance fee, is scheduled to expire on June 1, 2007. (NOTE: heating oil is also subject to retail sales tax when purchased by consumers.)

Tax Rate

Same as motor vehicle fuel tax rate: 23 cents. (The federal government taxes diesel fuel at 24.4 cents per gallon, propane at 18.3 cents and natural gas at 4.3 cents.)

To encourage the use of nonpolluting fuels, RCW 82.38.075 provides an alternate fee schedule for natural gas or propane in lieu of the special fuel tax, based on the gross tonnage of the vehicle. The annual fee schedule ranges from \$45 to \$250 and is adjusted based on changes in the motor vehicle fuel tax rate enacted since 1977.

Heating oil tax: 0.6 cents per gallon.

Levied by

State

Administration

Department of Licensing. Effective January 1, 1999 special fuel is taxed on the basis of intended use. Non-dyed (clear) special fuel is intended for use on the public highways and is subject to special fuel tax at the terminal rack. The terminal rack suppliers remit the fuel tax directly to the Department of Licensing. Also, special fuel importers must report and remit the tax on imported special fuel. The tax is due by the 10th calendar day of the second month immediately following the reporting period. Dyed special fuel is

subject to sales tax instead of the special fuel tax, because it is intended for off-road use only. The retail sales tax applies to such fuel; it is paid by the consumer and remitted to the Department of Revenue by the retail vendor.

The heating oil tax is remitted by dealers of special fuel at the same time as their special fuel dealer's tax is paid.

1992	87,936	5.5	1.1

*Special fuel tax only; does not include heating oil tax.

Distribution of Receipts

The special fuel tax goes to the motor vehicle fund and is distributed in the same manner as the motor vehicle fuel tax.

The heating oil tax is deposited in the heating oil pollution liability trust account and is used by the Washington State Pollution Liability Insurance Agency.

Exemptions and Refunds

- fuel used in government vehicles for street construction and repair;
- publicly owned fire fighting equipment;
- special construction equipment defined in RCW 46.04.552;
- power take-off and pumping equipment;
- federally owned vehicles;
- special fuel used for heating;
- fuel used for incidental moving of equipment used principally on private property;
- nonprofit providers of transportation for the elderly or handicapped;
- urban passenger transportation systems;
- exemption for special fuel used in motor vehicles engaged in logging operations on federal lands;

- refund for bad debts claimed by special fuel dealers;
- refund for special fuel not used on public highways;
- refund for exported special fuel;
- refund for taxes paid erroneously or illegally;
- refund for special fuel that is lost or destroyed via fire, flood or explosion;
- refund for special fuel of more than 500 gallons that is lost as a result of leakage or other casualties.

History

Any special fuel was initially subject to the motor vehicle fuel tax that was adopted in 1921. A separate "use" fuel tax was established in 1941 which levied a 5 cent per gallon tax on diesel fuel. The current special fuel tax statute was adopted in 1971 with a rate of 9 cents per gallon. Subsequent rate changes are the same as for the gas tax.

The heating oil tax was established in 1995, effective on July 23, 1995. The tax was originally scheduled to expire on June 1, 2001 but was extended for six more years in 2000.

Discussion/Major Issues

The purpose of the tax is to supplement the motor vehicle fuel tax by imposing a tax on all fuels which are not subject to the motor vehicle fuel tax but which are used to propel motor vehicles on the highways of the state.
